

Nefertari Quality Policy

On behalf of **Nefertari International Schools** teachers, we promise to provide our children with an educational atmosphere and experience that aims to produce high academic results besides caring for their personality.

We focus on the ethical and educational development using the most up to-date technology. We establish a mutual relationship with parents to achieve a strong link between home and school.

We adhere to the needs of the school quality system with respect to the international standard BS EN ISO 9001.

Introduction

Hello and welcome to your second home. The school stimulates a healthy social environment and promotes independent learning through a high educational standard.

WE BELIEVE IN :

- Each child is a unique individual and that children develop at different rates.
- The kindergarten program should focus on the physical, social, emotional, aesthetic- creative, intellectual development of the child.
- A safe and secure environment that is marked by respect for the rights of others and acceptance of personal responsibility is conducive to effective learning.
- The early establishment of a positive self-concept and positive view of school provides a foundation for later achievement.

OUR GOALS

- To provide developmentally appropriate programs and activities at which each child can be successful.
- To integrate the developmental domains so that learning occurs primarily through a hands-on curriculum consisting of projects, themes, and playful activities.
- To ensure that the classroom is a laboratory of social relations, where children explore values, learn rules of social living, and respect for individual differences through experience.
- To create an environment where children, teachers and parents work together in a cooperative spirit and frame of mind to consistently encourage each child's maximum development.
- To provide effective communication skills (oral, writing, listening, reading) that are interwoven into the child's daily experiences.
